

Consultant Support for the Development of Watershed
Restoration and Protection Projects

Request for Proposals (RFP) Issued August 11, 2025
Chagrin River Watershed Partners (CRWP)

No.	QUESTIONS AND RESPONSES (Issued September 3, 2025)
1	<p>Date Question Received: 8/25/25</p> <p>Question: Will the consultant be involved in identifying projects?</p> <p>CRWP Response: A preliminary list of projects has been identified through community stakeholder meetings throughout 2025, but we anticipate that this list may change as projects continue to be scoped and new opportunities arise through additional stakeholder engagement to occur through the remainder of 2025. The selected consultant may be asked to help identify possible solutions for local water quality challenges and may be asked to provide input to help prioritize projects based on anticipated water quality improvements, feasibility, cost effectiveness or other factors.</p>
2	<p>Date Question Received: 8/25/25</p> <p>Question: Will the consultant be responsible for a minimum set of deliverables?</p> <p>CRWP Response: This will be a time-based billing contract. CRWP has a preliminary project list but this list may change as project opportunities are explored. In order to remain flexible and to allow us to bring on a consultant earlier in the watershed planning process so that the consultant can assist us with initial project scoping and prioritization, the preliminary project list was not included in the RFP. Therefore, specific projects and a specific number of deliverables are not included in the RFP/contract.</p>
